Atlanta Public Schools Selects SafeSchools Training to Increase Safety

Award-winning Online Staff Training System integrates with Truenorthlogic to provide safety and compliance training to 7,000 employees

Cincinnati, Ohio (July 30, 2014) – [Scenario Learning](#), developer of safety and compliance solutions for schools and workplaces, announces that Atlanta Public Schools has adopted the [SafeSchools Online Staff Training System](#) to help increase staff and student safety throughout its 105 buildings. Nearly 7,000 Atlanta Public Schools staff members now have access to hundreds of online courses covering important school safety topics.

The district selected SafeSchools Training as its training and compliance provider because the program provides an abundance of resources for support staff, and it easily integrates with the district's existing professional learning management system through [Truenorthlogic](#).

"SafeSchools Training courses are short and easy for our staff to take and understand, so it's very impactful in a short period of time," said Janet Johnson, learning management specialist for Atlanta Public Schools. "We love the flexibility that online training provides because we can have staff train individually in SafeSchools Training, or we can use the courses in a meeting or group setting for blended, group learning. SafeSchools Training is a very versatile training option for our district."

The SafeSchools Training System seamlessly integrates with Atlanta Public Schools' online professional learning management system, MyPLC, giving staff an easy single-sign-on solution. All SafeSchools Training courses are available through MyPLC, and course completions are automatically tracked in both systems. Once a course is complete, the user receives immediate credit for the course in both systems, making it easy for district administrators to manage compliance.

"We applaud Atlanta Public Schools for their commitment to increasing school safety for staff and students," said Scenario Learning CEO Brian Taylor. "Our system helps the district easily deliver important staff training in an efficient manner, while maximizing the investment they've already made in their professional learning management platform."

All SafeSchools Online Staff Training courses are 100 percent school-focused and written by the nation's leading safety experts. Using the online courses, administrators

MORE

can easily track training completions, monitor progress, download compliance reports and view or print certificates of completion.
